

Supplementary Figure 1 legend

Ex vivo analysis of wild-type and $G\alpha_{12}/G\alpha_{13}$ -deficient platelets. Platelets were stimulated with increasing concentrations of collagen. Addition of stimulus is indicated by arrows. WT, wild-type; $12^{-/-}$, *Gna12*^{-/-}; $13^{-/-}$, *Gna13*^{-/-}; $12/13^{-/-}$, *Gna12*^{-/-};*Gna13*^{-/-}.
